November 5,

Part C: Discrepancies

Please provide an explanation *if* the total number of voters checked in \neq the total number of votes cast.

For example:

1. At 9am a voter left the precinct w/o casting a ballot. The ballot was voided. Because of this, our pollbook total is one more than our scanned total.
 2. Our total number of ballots scanned does not equal the number checked in on the pollbook. We do not know why this happened, but we accept the machine total.
